

## RZ10R Radiator Flush

RZ10R Radiator Flush is formulated with additives that circulate through the cooling system to remove scale, loosen rust, mineral deposits and oily residues.

- Cleans all from engine-block to radiator and heater cores.
- Clears blockages which can cause overheating. Restores effective cooling and improves heater performance.
- Restores the function of valves, thermostats and water pumps.
- Excellent performance in all types of cooling liquid, including OAT coolant.
- Suitable for all radiator types, and harmless to rubber hoses and gasket materials.

### Application:

- Gasoline and diesel engine cooling system.

### Usage direction:

One bottle (250ml) treats for at most 12L coolant. Add directly into radiator before changing coolant. Run engine and idle for 15 minutes, drain, or wash with professional equipment.

Our high-performance additives for gasoline and diesel engines ensure noticeable improvements in the properties of the engine in fuel or in engine oil.

**Content:** 250 ml

**Content Carton:** 12 Bottles

### Typical characteristics

Property	Method	Unit	Value
Colour		-	colorless
Odor		-	Characteristic odour
Physical state		-	fluid
Kinematic viscosity	ISO 3104/3105	g/ml	1,2
Boiling point and boiling range		°C	100
Flash point	DIN EN ISO 2592	°C	>93
Autoflammability		°C	>200
Relative density		g/ml	1,01
Water solubility		-	Miscible in all proportions

These parameters are typical of current production. The data does not include any assurance of properties or the guarantee of suitability for a special application. Existing statutory provisions and ordinances, which relate to the handling and use of the products, must be observed by the recipient of our products.
