

## RZ20AT Automatic Transmission Protector

RZ 20AT Automatic Transmission Protector is highly effective and concentrated which provides comprehensive and strong protection for all kinds of automatic transmission.

- Effectively protects the electromagnetic induction device in the automatic transmission, and maintains the sensitivity of the valve body.
- Effectively improves the transmission speed of the automatic transmission, which is fast and smooth.
- Reduces wear and tear of internal parts of gearbox and extends its service life.
- Excellent corrosion resistance to prevent contamination and corrosion of internal parts of gearbox.
- Protects seals and O-rings.

### Application:

- Gasoline and diesel engine 4-9 speed automatic transmission and all types of gearboxes such as DSG/CVT.

### Usage direction:

Add directly into gearbox. Or operate by using professional gearbox system equipment.

Our high-performance additives for gasoline and diesel engines ensure noticeable improvements in the properties of the engine in fuel or in engine oil.

**Content:** 150 ml

**Content Carton:** 24 Bottles

### Typical characteristics

Property	Method	Unit	Value
Colour		-	Dark brown
Odor		-	Characteristic odour
Physical state		-	Oily
Kinematic viscosity	ISO 3104/3105	g/ml	58
Flash point	DIN EN ISO 2592	°C	105
Relative density		g/ml	0,92
Water solubility		-	Insoluble

These parameters are typical of current production. The data does not include any assurance of properties or the guarantee of suitability for a special application. Existing statutory provisions and ordinances, which relate to the handling and use of the products, must be observed by the recipient of our products.
