

## RZ20R Radiator Stop Leak

RZ20R Radiator Stop Leak is a sealing product to stop small leaks in the radiator, cooling and heating system, and the gaskets.

- Formulated to avoid the clogging of radiator waterways and temperature sensors.
- Tough enough to withstand the pressure and the temperatures in the cooling system and pliable enough to survive jolts and vibrations.
- Completely compatible with anti-freezing agents and anti-boiling products.
- Enhanced protection against rust and corrosion.
- Prevents major damage from loss of coolant and engine overheating.
- Harmless to rubber hoses, gaskets or other system components.

### Application:

- Gasoline and diesel engine cooling system.

### Usage direction:

One bottle (250ml) treats for at most 12L antifreeze. Add directly into radiator.

Our high-performance additives for gasoline and diesel engines ensure noticeable improvements in the properties of the engine in fuel or in engine oil.

**Content:** 250 ml

**Content Carton:** 12 Bottles

### Typical characteristics

Property	Method	Unit	Value
Colour		-	Green-blue
Odor		-	Characteristic odour
Physical state		-	fluid
Kinematic viscosity	ISO 3104/3105	g/ml	125
Boiling point and boiling range		°C	100
Autoflammability		°C	>200
Relative density		g/ml	1,023
Water solubility		-	Miscible

These parameters are typical of current production. The data does not include any assurance of properties or the guarantee of suitability for a special application. Existing statutory provisions and ordinances, which relate to the handling and use of the products, must be observed by the recipient of our products.
