

RZ21G Injection System Clean - Direct injection – 5 in 1 fuel Additiv

RZ 21G Injection System Clean is specially formulated to remove varnish, gum, and other deposits from fuel injectors and intake valves. The formulation was specially developed for vehicles with direct injection.

- Removes carbon deposits on valve, injector, spark plugs and combustion chamber to delay the formation of carbon deposits.
- Restores lost power, improves fuel economy, and reduces emissions.
- Protects against rust and corrosion.
- Helps to lubricate engine valve and protect it from premature wear.
- Improves acceleration, power and performance.

Application:

- Gasoline engine fuel system with direct injection (only used for gasoline tank)

Usage direction:

Add directly into gasoline tank, one bottle (300ml) treats for 60L gasoline.

Special feature:

- TÜV certified

Our high-performance additives for gasoline and diesel engines ensure noticeable improvements in the properties of the engine in fuel or in engine oil.

Content: 300 ml

Content Carton: 24 cans

Typical characteristics

Property	Method	Unit	Value
Colour		-	yellowish
Odor		-	Characteristic odour
Physical state		-	Fluid
Kinematic viscosity	ISO 3104/3105	g/ml	1,5
Boiling point and boiling range		°C	130-220
Flash point	DIN EN ISO 2592	°C	66
Autoflammability		°C	200
Relative density		g/ml	0,7956
Water solubility		-	Slightly soluble

These parameters are typical of current production. The data does not include any assurance of properties or the guarantee of suitability for a special application. Existing statutory provisions and ordinances, which relate to the handling and use of the products, must be observed by the recipient of our products.
