

RZ23D Diesel Purge

RZ23D Diesel Purge is a highly effective combination of active agents for cleaning injectors and removing carbon deposition in the diesel fuel system.

- Cleans and maintains the cleanliness of port injectors and other fuel system components.
- Removes carbon built-up on the engine valve and delays carbon built-up after cleaning.
- Improves injector spray pattern.
- Protects injector and other parts of fuel system from excessive corrosion.
- Helps to prevent rough idle, engine surge and hesitation.
- Improves cold starting properties, combustion and engine performance.
- Removes harmful deposits that build up in the fuel system, leading to fuel savings and reduced emissions.
- Suitable for use in diesel engines with and without particulate filters.

Application:

- Diesel engines (Used with equipment only)

Usage direction:

For the use of the RZ23D we recommend the use of the RZ injection system cleaning device. Use according to the operating instructions. Do not pour the product into the fuel tank!

Our high-performance additives for gasoline and diesel engines ensure noticeable improvements in the properties of the engine in fuel or in engine oil.

Content: 500 ml

Content Carton: 24 cans

Typical characteristics

Property	Method	Unit	Value
Colour		-	Yellowish
Odor		-	Characteristic
Physical state		-	fluid
Kinematic viscosity	ISO 3104/3105	g/ml	1,6
Boiling point and boiling range		°C	184 – 214
Flash point	DIN EN ISO 2592	°C	65
Ignition temperature		°C	233

These parameters are typical of current production. The data does not include any assurance of properties or the guarantee of suitability for a special application. Existing statutory provisions and ordinances, which relate to the handling and use of the products, must be observed by the recipient of our products.
