

RZ28G Combustion Chamber Cleaner

RZ28G Combustion Chamber Cleaner is a highly effective combination of active agents for cleaning injector and engine protection.

- Cleans and maintains the cleanliness of port injector nozzles and other fuel system components.
- Removes carbon built-up on the engine valve and delays carbon built-up after cleaning.
- Improves injector spray pattern.
- Protects injector and other parts of fuel system from excessive corrosion.
- Helps to prevent rough idle, engine surge and hesitation.
- Improves cold starting properties, combustion and engine performance.
- Removes harmful deposits that build up in the fuel system, leading to fuel savings and reduced emissions.
- Formulated to work in a broad range of petrol and ethanol fuels.

Application:

- Gasoline/diesel engine combustion chamber.

Usage direction:

For the use of the RZ28G we recommend the use of the RZ injection system cleaning device. Use according to the operating instructions. One bottle is used for the 4-cylinder engine and 2 bottles are used for the 6-8-cylinder engine.

Our high-performance additives for gasoline and diesel engines ensure noticeable improvements in the properties of the engine in fuel or in engine oil.

Content: 500 ml

Content Carton: 12 Bottles

Typical characteristics

Property	Method	Unit	Value
Colour		-	
Odor		-	
Physical state		-	
Kinematic viscosity	ISO 3104/3105	g/ml	
Boiling point and boiling range		°C	
Flash point	DIN EN ISO 2592	°C	
Autoflammability		°C	
Relative density		g/ml	
Water solubility		-	

These parameters are typical of current production. The data does not include any assurance of properties or the guarantee of suitability for a special application. Existing statutory provisions and ordinances, which relate to the handling and use of the products, must be observed by the recipient of our products.
