

RZ33G Catalytic Converter Cleaner

RZ33G Catalytic converter cleaner is formulated to ensure complete combustion. It helps to cut toxic gas emission significantly.

- Effectively solves the problems of catalytic converters such as sulfur-phosphorus compound blockage, poor exhaust and power loss.
- Reduces hydrocarbon ("HC"), nitrogen oxides ("NOx"), and carbon monoxide ("CO") emissions in part by cleaning up fuel injector, carburetor, intake valve, and combustion chamber deposits.
- Restores the exhaust purification function of catalytic converters and extends its life.
- Reduces carbon build-up in catalytic converter, oxygen sensors, fuel injectors and cylinder heads.
- Improves fuel efficiency by restoring the air-fuel ratio.

Application:

- Gasoline engine exhaust system.

Usage direction:

Wash with professional ternary catalytic cleaning equipment, operate by professional technicians and follow the equipment operating instructions for details.

Our high-performance additives for gasoline and diesel engines ensure noticeable improvements in the properties of the engine in fuel or in engine oil.

Content: 450 ml

Content Carton: 24 cans

Typical characteristics

Property	Method	Unit	Value
Colour		-	
Odor		-	
Physical state		-	
Kinematic viscosity	ISO 3104/3105	g/ml	
Boiling point and boiling range		°C	
Flash point	DIN EN ISO 2592	°C	
Relative density		g/ml	
Water solubility		-	

These parameters are typical of current production. The data does not include any assurance of properties or the guarantee of suitability for a special application. Existing statutory provisions and ordinances, which relate to the handling and use of the products, must be observed by the recipient of our products.
