

## RZ60E Throttle Body Cleaner

RZ60E Throttle Body Cleaner is formulated to clean the throttle body, throttle plate, and air intake components safely, rapidly, and effectively.

- With high pressure spray, cuts and removes gum/resin, oil, greasy deposits and dirt that build up in carburetors, throttle bodies, automatic chokes, PCV and EGR valves.
- Evaporates fully in seconds, leaving no residue.
- Ensures proper function of the throttle body, perfect power transmission, stable engine idle and prevents stalling.
- Reduces poor exhaust emissions. Safe for oxygen sensors, catalytic converters, and coated components.

### Application:

- Gasoline engine fuel system (only used for gasoline tank)

### Usage direction:

According to the different parts and structure of the throttle body of the vehicle intake system, the corresponding cleaning method is adopted. It can be cleaned when the vehicle starts or stops, align the intake system throttle body for jet cleaning.

Our high-performance additives for gasoline and diesel engines ensure noticeable improvements in the properties of the engine in fuel or in engine oil.

**Content:** 200 ml

**Content Carton:** 12 cans

### Typical characteristics

Property	Method	Unit	Value
Colour		-	colorless
Odor		-	Characteristic odour
Physical state		-	gaseous
Kinematic viscosity	ISO 3104/3105	g/ml	1,3
Boiling point and boiling range		°C	55-137
Flash point	DIN EN ISO 2592	°C	<-12
Autoflammability		°C	365
Relative density		g/ml	0,781
Water solubility		-	miscable

These parameters are typical of current production. The data does not include any assurance of properties or the guarantee of suitability for a special application. Existing statutory provisions and ordinances, which relate to the handling and use of the products, must be observed by the recipient of our products.
